

Protecting People, Assets and Environment

Vision

Create an enduring legacy, benchmark across industries through knowledge & innovative expertise

Mission

Bridging the Industrial gaps in niche domains of Energy, Oil, Gas, Power & Water with quality products & services, by creating & adding value as Market Leaders, ensuring growth for Employees & High returns to Investors, Customers.

Core Values

Safety: With a goal of zero accidents, safety is part of our culture, a value considered with each decision made by management, administrators, foremen, and field employees. Following the Best Practices of Safety, we live and encourage People to keep safety at the forefront of every action, whether in the office, at the jobsite, in the car, or on the weekend.

Quality: 100 % committed for providing the highest quality materials and service for every project. Through our close relationships with our suppliers and active participation with the Customers, we supply the best product & services, deploy trained field employees, and support the tasks in the Right way. We provide the highest quality in the most productive and environmentally-conscious way.

Integrity: Profit should be the result of good business. We Believe and Practice in what we say, inspiring trust in our Customers, our Partners, and our Employees. We strive to “do the right thing” in all situations.

Innovation: For continued Success we embrace new ideas & encourage People to look for Continuous improvements in everything we do.

Responsibility: We take complete responsibility of deliverables and ensure Targets are met as per agreed timeline

Corporate Profile

BIEWU International utilizes years of global business expertise in multiple fields to create promising business ventures worldwide. From our base in New Jersey, USA, BIEWU International reaches far across the globe, offering a concept-to-completion approach for bringing a principal company to market.

BIEWU International was established in early 2007, with a vision and mission to become a solution provider at the forefront of the Health, Safety, Environment, Corrosion Solutions, Specialty Chemicals, Reverse Engineering, NDT and Renewable Energy Industries.

Our success is exemplified in large-scale preservation/mothballing projects at the plant level offering a complete package that encompasses Technology/Product Supply and Application, Project Management, Logistics, Manpower, and Service Agreements for the Power, Oil and Gas Industries.

At BIEWU, we do this and more by educating people to work safely and equipping them with innovative ways and means to protect their assets and environment. We are committed to becoming a leading independent company in the energy industry by maintaining strong advances in Technical Innovation, High Quality Products, Services, and Focused on finding best solutions to our clients' problems.

We are one of the industry leaders in offering products and services in the Health, Safety and Environment Industry. Additionally, we offer corrosion removal and protection services utilizing state-of-the-art Vapor-phase Corrosion Inhibition Technology to protect plants, enhancing service-life of equipment, and innovative solutions to corrosion challenges. Our team focuses on providing cutting-edge solutions in the fields of Reverse Engineering, Advanced NDT Techniques, and Superior Inspection solutions. Our upstream divisions include specialty production chemicals and include state-of-the-art multi-phase flow metering systems and wellhead services.

We look to constantly maintain the highest levels of integrity to protect the interest of all parties involved. The end result: Success on a global scale.

BIEWU International has the flexibility and stamina to grow, change and compete in some of the most technologically advanced industries on earth. We strive to remain on the cutting-edge in the fields of industrial and renewable energy, as well as capital funding of such projects and businesses.

Our Strength

WORK CULTURE

At BIEWU, safety is an attitude and our work culture. We put into action our time-tested and proven experiences to help our customers keep their assets operationally sound as well as safe from potential hazards. Customer satisfaction and zero incidents is our business philosophy.

PRODUCTS, SERVICES AND TECHNOLOGY

High quality products and services and unparalleled customer service; to deliver value through innovation are our key strengths. A large stock-base and an agile ever growing fleet coupled with a dedicated services team yields continuous customer satisfaction.

PARTNERS IN BUSINESS

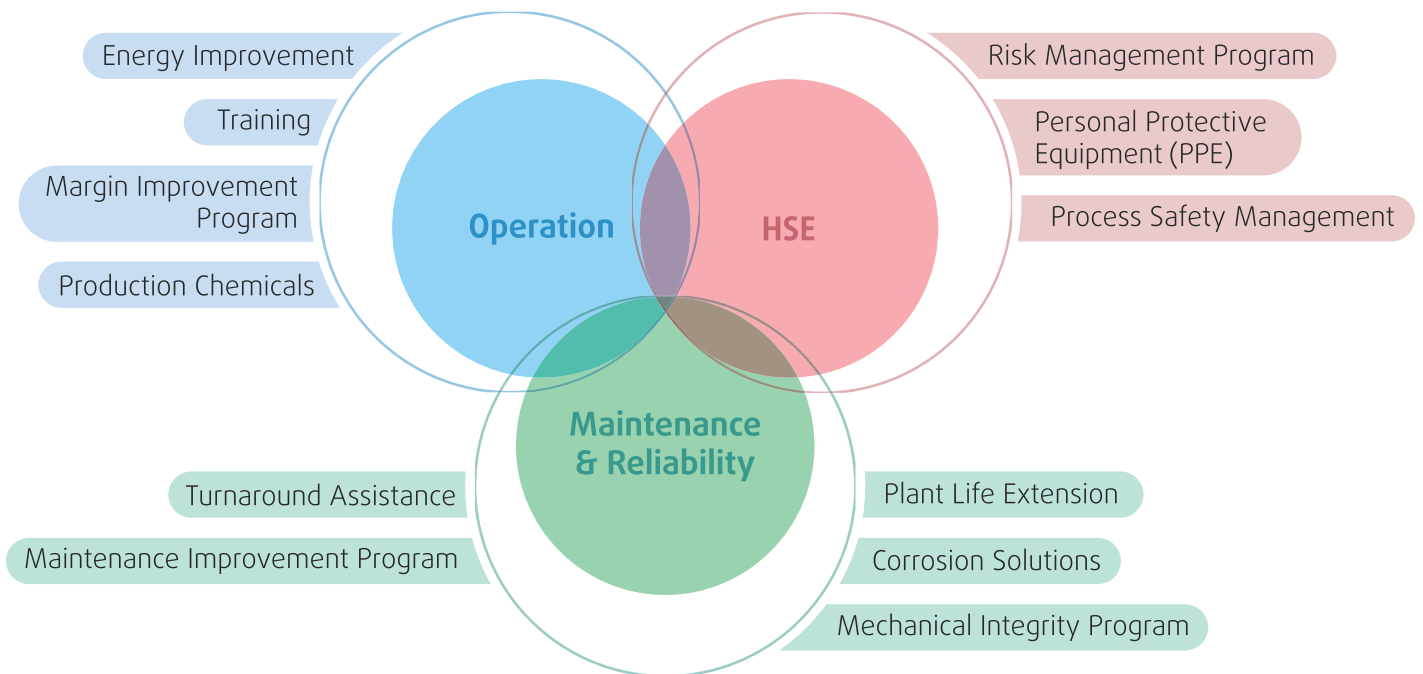

Our partners in business are internationally reputed companies who are leaders in their respective fields. This is complimented by strong technical support from a team of dedicated and committed staff, enabling us to stand shoulder to shoulder with giants in the industry and provide the right solutions in the right way at the right time.

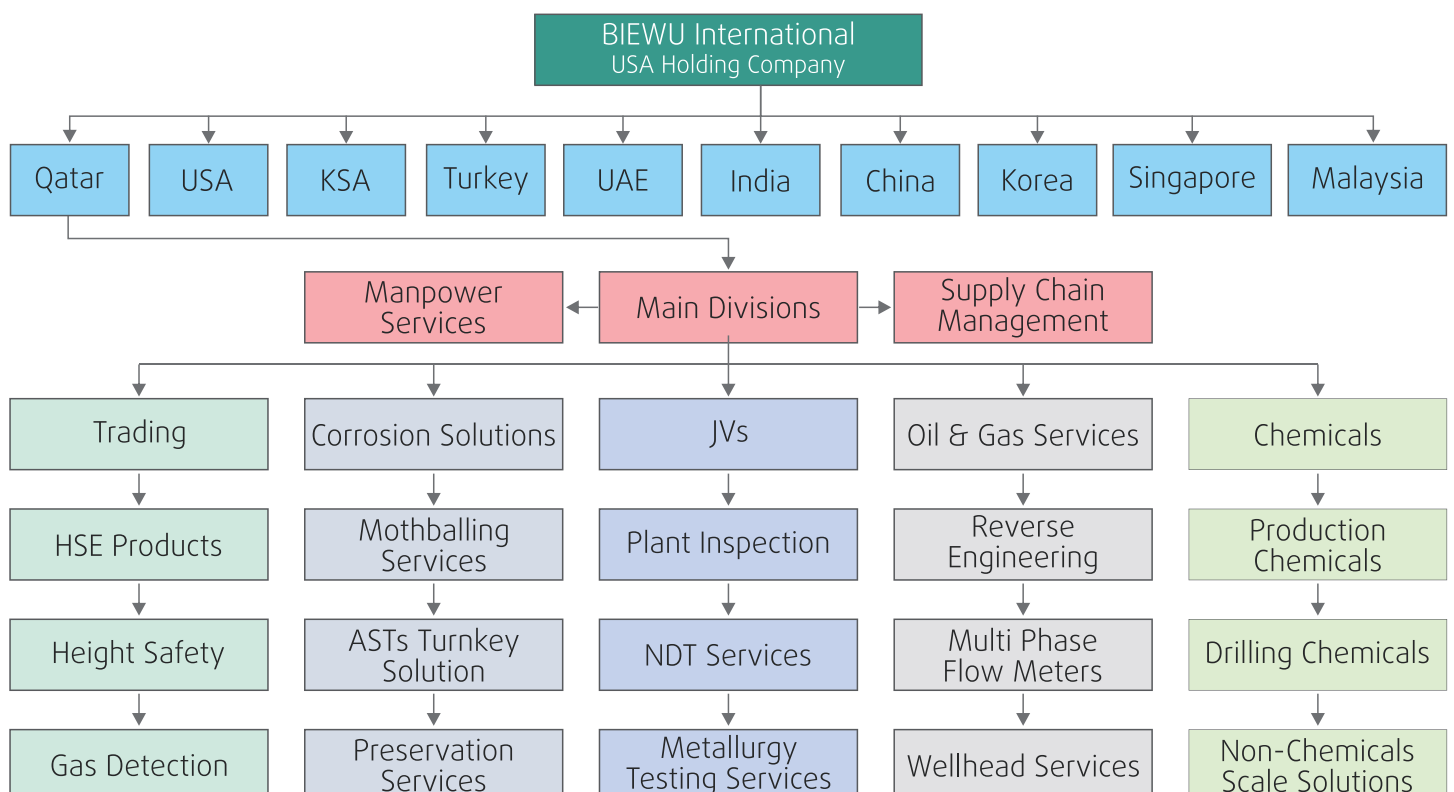

Operational Excellence Services

BIEWU offers a wide variety of services and solutions to solve the problems its clients confronts.

BIEWU applies its wealth of experience and know – how to achieve significant improvements in safety, asset integrity, reliability, turnaround, cost competitiveness and profitability.

Corporate Structure

Products and Services

SAFETY SOLUTIONS

- › PPE Head to Toe
- › Fall Protection Equipment
- › Gas Detection & Breathing Apparatus
- › Electrical Safety

ENVIRONMENTAL SOLUTIONS

- › Spill Control
- › Scale Inhibition
- › Cleaning / Degreasing Services
- › Sludge Treatment

CORROSION SOLUTIONS

- › Tank Protection
- › Preservation and Mothballing
- › Corrosion Under Insulation
- › Maintenance and Repair Operations (MRO)
- › Rust Removal and Protection Solutions
- › Coatings and Additives

MANPOWER SUPPORT SERVICES

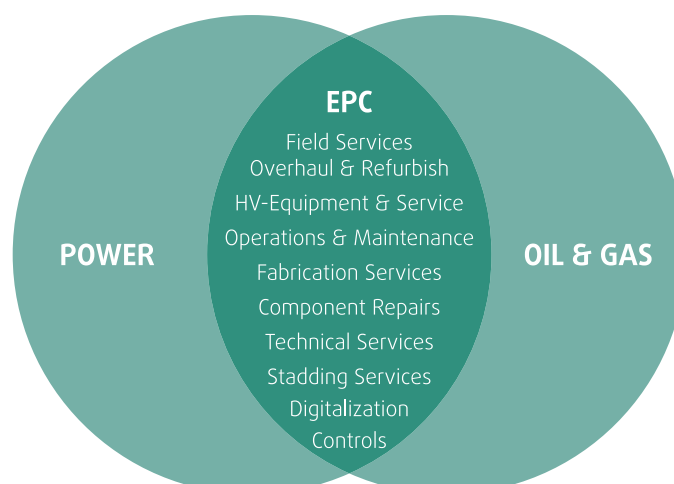

- › Permanent Placements (Executive, Mid and Senior Level's)
- › Contractual Placements (Technical & Non-Technical)
- › Consultants for Specialised & Niche Skills
- › Complete Manpower support for Turn Around & Shut Down Projects

OIL & GAS

- › Turbine Services
- › Reverse Engineering
- › Specialty Chemicals
- › NDT & Inspection Services
- › Multi Phase Flow Meters
- › Wellhead Services
- › Asset Lifecycle Enhancement – Industry 4.0

Energy & Utility Services

We build, manage, and maintain energy assets
